MINISTER OF INTERNATIONAL TRADE

Office of the Minister

324 Legislature Building, Edmonton, Alberta, Canada T5K 2B6 403/427-2535 Telex 037-2638

March 1984

Dear Reader

Due to the importance of Alberta's oil and gas resources to not only the Canadian market, but also as a major international credit, Alberta manufacturers have emerged and forged a unique reputation globally for their expertise and leading-edge developments.

A key factor in this Industry's seasoning has been a rich heritage of four decades in providing the necessary products to enhance Alberta's pre-eminent position in the Canadian energy picture. Complexities of terrain, climate and geological configuration have resulted in some of the most sophisticated technologies in drilling, engineering and recovery techniques.

In the humid jungles of the Far East, the burning deserts of North Africa, through the wave-tossed depths of the North Sea; frontier technology has been transferred around the world. Over 55 countries are now actively engaged in procuring equipment manufactured in Alberta for exploration, drilling, servicing and production of oil and gas.

Performing in every environment and under every condition is the pride of the contribution these companies have made to the energy industry. This index provides an outline of those products produced in Alberta by the Province's leading manufacturers of gas and oilfield equipment. Be assured that further information can be obtained by directly contacting any one of the companies listed herein.

Sincerely,

Horst A. Schmid
Minister of International Trade
Alberta, Canada

TABLE OF CONTENTS

INTRODUCTION:

OIL AND GASFIELD EQUIPMENT MANUFACTURING IN ALBERTA

SECTION 1:

PAGE NO.

ALBERTA MADE PRODUCTS

In this section the names of specific oil and gasfield products and respective manufacturers are listed alphabetically.

1

SECTION 2:

ALBERTA EQUIPMENT MANUFACTURERS

In this section the oil and gasfield equipment manufacturers of the province are listed alphabetically with a full description of all products produced.

56

HOW TO USE THE INDEX

Each company's catalogue information is arranged in general alphabetical order by the name of the company.

If you are looking for a product and do not know a company name, or if you want to know all of the companies which have data in the Index on that item, then refer to the Index of Products. This will give you the list of all companies manufacturing or assembling this product in Alberta for export sale.

If you know the company name, refer to the Company Index. This will list the company, its address, phone number, telex and all its export products.
